EDUCATION POLICY OF THE COLLEGE

A pioneering institution in the educational and cultural regeneration of Malabar region, Pocker Sahib Memorial Orphanage College (PSMO) promotes an excellent and holistic development of each student in both academic and non-academic fields. Academically, PSMO stands among one of the best colleges in the Northern Malabar area of the state of Kerala offering educational programs in Arts, Science and Commerce streams. The academic thrust of PSMO College lies in its unique service of providing education from elementary to doctoral levels through the bi-lingual medium for the students from all the sections of the society, with a priority to the ones from the underprivileged sections of the coastal belt area of the Malabar region.

The college currently offers 5 PhD programmes, 8 PG Programmes, and 10 UG Programmes in regular mode. Further, the college provides a flexible academic framework through the Choice Based Credit and Semester System as offered by the University of Calicut to which the college is affiliated. An education policy has been formulated to ensure the quality teaching and constructive learning atmosphere to its stakeholders that impart in them the ethical –human-constitutional values, and empower them with various life skills. One of the dominant highlights of PSMO's Education Policy is its commitment to the upliftment of the marginalized sections of society to face the challenges in life with dignity. The other traits of the college's Education policy are:

- To incorporate the various intervention measures in admissions through reservations and relaxations to various unrepresented and under-represented categories.
- To provide quality teaching, learning and research environment to the students, especially the spirit of fostering new research culture in the students.
- To impart quality higher education through blended teaching-learning methods.
- To ensure continuous improvement in teaching and learning by implementing continuous assessment and evaluation schemes than a summative method of annual evaluation.

- To display the answer scripts and internal marks of the students concerned and hold discussions with the students to improve their learning and writing experiences before the declaration of University Exams.
- To develop an Online Student Feedback system to improve the quality of teaching, learning and evaluation, and assessment of learning outcomes.
- To ensure the faculty and students receive funds and scholarships for conducting major/minor research and innovation projects.
- To sign up for MoUs of the strategic partnership with national & international institutions towards expanding academic, research and training activities through collaborations.
- To produce socially responsible and committed personalities who could contribute to society's upliftment and nation-building.

The college has been meticulously implementing and ensuring these engagements to make an impact on the student community and the society at large that in turn help the Central/State government and agencies to make critical interventions in shaping the individuals for better community development in terms of Education and Enlightenment.
